DETAILED ACTION

ART UNIT DESIGNATION

The Group and/or Art Unit designated for this application has changed. Applicants are hereby informed that future correspondence regarding this application should be directed to Group Art Unit 1631.

OBJECTION BY DRAFTSMAN

Applicants are hereby notified that the required timing for correction of drawings has changed. See the last 6 lines on the sheet, which is attached, entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicants are required to submit drawing corrections with the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

CANCELLED CLAIM

Claim 30 has been cancelled as indicated by applicants.

Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-14, 36-47, 53, and 54 drawn to a non-nucleic acid array assay device, classified in class 435, subclass 7.1.
- II. Claims 15-26, 28, 29, and 48-52, drawn to a method for determining the presence of a disease condition or disorder, classified in class 435, subclass 4.
- III. Claims 27 and 55, drawn to a method of treating cancer or a propensity to develop cancer, classified in class 514, subclass 1.

Art Unit: 1631

IV. Claims 31-35, drawn to a method for identifying a protein mimetic, classified in class 435, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the non-nucleic acid array assay device of Group I can be used in the alternative inventions of Groups II-IV, drawn to a method for determining the presence of a disease condition or disorder (Group II); a method of treating cancer or a propensity to develop cancer (Group III); and a method for identifying a protein mimetic (Group IV). Thus, the above methods are clearly distinct uses of said non-nucleic acid array assay device and formulate the restriction requirement.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

INVENTORSHIP AMENDMENT

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
